

Sheltered Accommodation

Location: Hendon
Type: Sheltered Accommodation
Project Value: £18,500.00

Sheltered Accommodation

Ventol were tasked with the upgrade of the existing fire alarm control panel from a 4 loop control panel to an 8 loop control panel due to loop loading issues. Our in-house, engineers installed new fire rated cabling to devide the loop detection circuits and completed the full installation and commissioning within a tight programme.

Scope of Work

- Issue site specific risk assessment and method statement.
- Installation of FP200 fire rated cables to ground, first and second floors
- Installation of Advanced 8 loop fire alarm control panel as per technical specification
- Program, test and commission on completion of works.
- Programmed and uploaded revised system cause & effects to client specification
